INDEX TO VOLUME 26 1991

Index to Authors and Contributors

ADALI, S. *Paper* Bending of cross-ply laminated plates with matrix cracks, 253
ANDREWS. J. D. *Paper* A finite element analysis of bending stresses induced in external and internal involute spur gears, 153

BAGAVATHIPERUMAL, P. *Paper* Elastic load–displacement predictions for coned disc springs subjected to axial loading using the finite element method, 147

CAMPOS, J. M. *Paper* X-ray measurement of residual stresses in a rolled bolt: application to the calculation of stress intensity factors after cracking, 103
CHANDRASEKARAN, K. *Paper* Elastic load–displacement predictions for coned disc springs subjected to axial loading using the finite element method, 147
CROOK, A. W. *Paper* A transfer matrix method for calculating the elastic behaviour of annular plates, 65

DUNNE, F. P. E. *Paper* An expert system for the determination of creep constitutive equations based on continuum damage mechanics, 185

ETEMAD, M. R. *Paper* Estimates of regions of stress concentrations in 'T' butt weld geometries, 77
EZEILO, A. N. *Conference Report* A review of the 9th International Conference on Experimental Mechanics, August 1990, Copenhagen, Denmark, 259

FENG, Z. *Paper* Stress intensity determination by an experimental–numerical technique, 243
FENNER, R. T. *Paper* Design optimization using the boundary element method, 231

GIBBONS, C. *Paper* The experimental assessment of the force components within structural steel 'H' sections, 31
GIBBONS, C. *Paper* A mechanical electrical device for measuring the three-dimensional deformation of steel columns, 1
GOOYER, L. E. *Paper* The stress distributions in shouldered shafts under axisymmetric loading, 181
GOWHARI-ANARAKI, A. R. *Paper* Low cycle fatigue life predictions for hollow tubes with axially loaded axisymmetric internal projections, 133

HARDY, S. J. *Paper* Static analysis of short beams, 15
HARDY, S. J. *Paper* Low cycle fatigue life predictions for hollow tubes with axially loaded axisymmetric internal projections, 133
HAYHURST, D. R. *Paper* An expert system for the determination of creep constitutive equations based on continuum damage mechanics, 185
HUANG, Y. M. *Paper* Qualitative stress analysis based on the measured trace of the stress tensor, 55

JAFFAR, M. J. *Paper* Elastic strips in sliding contact, 193

KIRBY, P. A. *Paper* A mechanical electrical device for measuring the three-dimensional deformation of steel columns, 1
KIRBY, P. *Paper* The experimental assessment of the force components within structural 'H' sections, 31

LABOSSIÈRE, P. *Paper* A parametric failure criterion for paperboard material, 209

MAKINS, R. K. *Paper* Bending of cross-ply laminated plates with matrix cracks, 253
MANIVASAGAM, S. *Paper* Elastic load-displacement predictions for coned disc springs subjected to axial loading using the finite element method, 147
McCONNELL, L. D. *Communication* 75
MISTRY, J. *Paper* Effective stress factors for piping branch junctions due to internal pressure and external moment loads, 85
MOFFAT, D. G. *Paper* Effective stress factors for piping branch junctions due to internal pressure and external moment loads, 85
MOGHADDASI-TAFRESHI, A. *Paper* Design optimization using the boundary element method, 231
MONAGHAN, J. M. *Paper* The influence of lubrication on the design of yield tightened joints, 123
MWENIFUMBO, J. A. M. *Paper* Effective stress factors for piping branch junctions due to internal pressure and external moment loads, 85
MYERS, T. G. *Paper* A series solution method for sharp asymmetric dry contact problems, 39

NASU, Y. *Paper* Evaluation of yield function including effects of third stress invariant and initial anisotropy, 47
NEALE, K. W. *Paper* A parametric failure criterion for paperboard material, 209
NETHERCOT, D. A. *Paper* A mechanical electrical device for measuring the three-dimensional deformation of steel columns, 1
NETHERCOT, D. A. *Paper* The experimental assessment of the force components within structural steel 'H' sections, 31

OVERBEEKE, J. L. *Paper* The stress distribution in shouldered shafts under axisymmetric loading, 181

PING, HU *Paper* Nodular iron joint welded with nickel–iron electrodes: hybrid/mixed finite element analysis, 175
PIPELZADEH, M. K. *Paper* Static analysis of short beams, 15

RAOOF, M. *Paper* The prediction of axial damping in spiral strands, 221
RAOOF, M. *Paper* Methods for analysing large spiral strands, 165
ROWLANDS, R. E. *Paper* Quantitative stress analysis based on the measured trace of the stress tensor, 55
ROWLANDS, R. E. *Paper* Stress intensity determination by an experimental–numerical technique, 243

SANCHEZ-GALVEZ, V. *Paper* X-ray measurement of residual stresses in a rolled bolt: application to the calculation of stress intensity factors after cracking, 103
SANFORD, R. J. *Paper* Stress intensity determination by an experimental–numerical technique, 243
SMITH, D. J. *Paper* Estimating the creep-fracture mechanics parameter $C[t]$ from uniaxial creep strain and rupture data, 111
STEPHEN, N. G. *Paper* Decay rates for the compound circular cylinder, 215

TAKEDA, T. *Paper* Evaluation of yield function including effects of third stress invariant and initial anisotropy, 47
TAKEDA, T. *Paper* The application of an anisotropic yield function of the sixth degree to orthortropic material, 201
TORIBIO, J. *Paper* X-ray measurement of residual stresses in a rolled bolt: application to the calculation of stress intensity factors after cracking, 103

XIAOYING, ZHANG *Paper* Nodular iron joint welding with nickel–iron electrodes: hybrid/mixed finite element analysis, 175
XU, S. H. *Paper* Effective stress factors for piping branch junctions due to internal pressure and external moment loads, 85

YATES, J. R. *Paper* A simple approximation for the stress intensity factor of a crack at a notch, 9

ZHENFENG, ZHOU *Paper* Nodular iron joint welded with nickel–iron electrodes: hybrid/mixed finite element analysis, 175

Subject Index

A FINITE ELEMENT ANALYSIS OF BENDING STRESSES INDUCED IN EXTERNAL AND INTERNAL INVOLUTE GEARS, *Paper*, 153
A MECHANICAL ELECTRICAL DEVICE FOR MEASURING THE THREE-DIMENSIONAL DEFORMATION OF STEEL COLUMNS, *Paper*, 1
A PARAMETRIC FAILURE CRITERION FOR PAPERBOARD MATERIAL, *Paper*, 209
A REVIEW OF THE 9th INTERNATIONAL CONFERENCE ON EXPERIMENTAL MECHANICS, AUGUST 1990, COPENHAGEN, DENMARK, *Conference Report*, 259
A SERIES SOLUTION METHOD FOR SHARP ASYMMETRIC DRY CONTACT PROBLEMS, *Paper*, 39
A SIMPLE APPROXIMATION FOR THE STRESS INTENSITY FACTOR AT A NOTCH, *Paper*, 9
A TRANSFER MATRIX METHOD FOR CALCULATING THE ELASTIC BEHAVIOUR OF ANNULAR PLATES, *Paper*, 65
AN EXPERT SYSTEM FOR THE DETERMINATION OF CREEP CONSTITUTIVE EQUATIONS BASED ON CONTINUUM DAMAGE MECHANICS, *Paper*, 185
Analysis:
  finite element, 175
  static, 15
  stress, 55
Anisotropic yield function, application of, 201
Anisotropy, initial, 47
Application of an anisotropic yield function, 201
Approximation for the stress intensity factor at a notch, 9
Asymmetric dry contact problems, 39
Axial damping in spiral strands, 221
Axial loading, 147
Axially loaded axisymmetric internal projections, 133

Beams, short, 15
Behaviour of annular plates, elastic, 65
BENDING OF CROSS-PLY LAMINATED PLATES WITH MATRIX CRACKS, *Paper*, 253
Bending stresses, finite element analysis of, 153
Boundary element method, 231
Branch junctions, piping, 85

Calculation of stress intensity factors, 103
Coned disc springs, 147
Contact:
  problems, 39
  sliding, 193
Continuum damage mechanics, 185
Cracks, matrix, 253
Creep constitutive equations, determination of, 185
Creep–fracture mechanics parameter $C[t]$, 111
Creep, uniaxial, 111
Cross-ply laminated plates, bending of, 253

Damage mechanics, continuum 185
Damping, axial, 221
Deformation of steel columns, 1
Design of yield tightened joints, 123
DESIGN OPTIMIZATION USING THE BOUNDARY ELEMENT METHOD, *Paper*, 231
Determination of creep constitutive equations, 185
Disc springs, coned, 147
Dry contact problems, 39

EFFECTIVE STRESS FACTORS FOR PIPING BRANCH JUNCTIONS DUE TO INTERNAL PRESSURE AND EXTERNAL MOMENT LOADS, *Paper*, 85
Elastic behaviour of annular plates, 65
ELASTIC LOAD–DISPLACEMENT PREDICTIONS FOR CONED DISC SPRINGS SUBJECTED TO AXIAL LOADING USING THE FINITE ELEMENT METHOD, *Paper*, 147
ELASTIC STRIPS IN SLIDING CONTACT, *Paper*, 193
Electrodes, nickel–iron, 175
ESTIMATED OF REGIONS OF STRESS CONCENTRATIONS IN 'T' BUTT WELD GEOMETRIES, *Paper*, 77
ESTIMATING THE CREEP–FRACTURE MECHANICS PARAMETER $C[t]$ FROM UNIAXIAL CREEP AND RUPTURE DATA, *Paper*, 111
EVALUATION OF YIELD FUNCTION INCLUDING EFFECTS OF THIRD STRESS INVARIANT AND INITIAL ANISOTROPY, *Paper*, 47
Experimental mechanics, 9th, International Conference on, 259
Experimental–numerical technique, 243
External moment loads, 85

Failure criterion parametric, 209
Fatigue life predictions for hollow tubes, 133
Finite element analysis: 175 see also Finite element method of bending stresses, 153
Finite element method, 147
Force components within structural steel 'H' sections, 31

Gears, spur, 153

'H' sections, 31
Hollow tubes, fatigue life predictions for, 133
Hybrid/mixed finite element analysis, 175

Influence of lubrication of the design of yield tightened joints, 123
Initial anisotropy, 47
Intensity factor, as a notch, 9
Internal pressure, 85
Internal projections, axially loaded axisymmetric, 133
Involute spur gears, external and internal, 153
Iron joint, nodular, 175

Joints, yield tightened, 123

Laminated plates, cross-ply, 253
Large spiral strands, methods for analysing, 165
Load–displacement, elastic, 147
Loading:
  axial, 147
  axisymmetric, 181
Loads, external moment, 85
LOW CYCLE FATIGUE LIFE PREDICTIONS FOR HOLLOW TUBES WITH AXIALLY LOADED AXISYMMETRIC INTERNAL PROJECTIONS, *Paper*, 133
Lubrication, influence of, 123

Matrix cracks, 253
Measured trace, of stress tensor, 55
Mechanics parameter $C[t]$, 111
METHODS FOR ANALYSING LARGE SPIRAL STRANDS, *Paper*, 175
Moment loads, external, 85

Nickel–iron electrodes, 175
NODULAR IRON JOINT WELDED WITH NICKEL–IRON ELECTRODES: HYBRID/MIXED FINITE ELEMENT ANALYSIS, *Paper*, 175
Notch, stress intensity factor at, 9

Orthotropic materials, 201

Paperboard material, 209
Parametric failure criterion, 209
Piping branch junctions, 85
Plates:
  annular, 65
  laminated, 253
Prediction of axial damping in spiral strands, 221
Pressure, internal, 85
Projections, axially loaded, 133

QUALITATIVE STRESS ANALYSIS BASED ON THE MEASURED TRACE OF THE STRESS TENSOR, *Paper*, 55

Regions of stress concentrations in 'T' butt weld geometries, 77
Residual stresses:
  X-ray measurement of, 103
  in rolled bolt, 103
Rupture data, 111

Series solution method, 39
Sharp asymmetric dry contact problems, 39

Short beams, static analysis of, 15
Shouldered shafts, stress distributions in, 181
Sliding contact, elastic strips in, 193
Solution method for sharp asymmetric dry contact problems, 39
Spiral strands, 165
  axial damping in, 221
Springs, coned disc, 147
Spur gears, involute, 153
STATIC ANALYSIS OF SHORT BEAMS, *Paper*, 15
Steel columns, three-dimensional deformation of, 1
Strands, spiral, 165, 221
Stress analysis, qualitative, 55
Stress concentrations in 'T' butt weld geometries, 77
Stress distributions in shouldered shafts, 181
Stress, factors for piping branch junctions, 85
STRESS INTENSITY DETERMINATION BY AN EXPERIMENTAL–NUMERICAL TECHNIQUE, *Paper*, 243
Stress intensity factor at a notch, 9
Stress intensity factors, the calculation of, 103
Stress invariant, 47
Stress tensor, measured trace of, 55
Stresses, bending, 153
Strips, elastic, 193
Structural steel 'H' sections, 31

'T' butt weld geometries, stress concentration in, 77
THE APPLICATION OF AN ANISOTROPIC YIELD FUNCTION OF THE SIXTH DEGREE TO ORTHOTROPIC MATERIALS, *Paper*, 201
THE EXPERIMENTAL ASSESSMENT OF THE FORCE COMPONENTS WITHIN STRUCTURAL STEEL 'H' SECTIONS, *Paper*, 31
THE INFLUENCE OF LUBRICATION ON THE DESIGN OF YIELD TIGHTENED JOINTS, *Paper*, 123
THE PREDICTION OF AXIAL DAMPING IN SPIRAL STRANDS, *Paper*, 221
THE STRESS DISTRIBUTIONS IN SHOULDERED SHAFTS UNDER AXISYMMETRIC LOADING, *Paper*, 181
Third stress invariant, 47
Three-dimensional deformation of steel columns, 1
Transfer matrix method, 65
Tubes, hollow, 133

Uniaxial creep and rupture data, 111

Weld geometries, 'T' butt, 77

X-RAY MEASUREMENT OF RESIDUAL STRESSES IN A ROLLED BOLT: APPLICATION TO THE CALCULATION OF STRESS INTENSITY FACTORS AFTER CRACKING, *Paper*, 103

Yield function:
  anisotropic, 201
  evaluation of, 47
Yield tightened joints, 123

9th International Conference on Experimental Mechanics, 259
